

PYA's Clinical Research Administration Office

No myths. Just possibilities.

Can your clinical trials program be a financial and operational success and ultimately provide greater clinical options for patients? With help from the experts in PYA's Clinical Research Administration Office, it can.

Is it possible to break through the myths to reach financial sustainability? Let PYA show you the possibilities.

Myth: Clinical trials cannot be financially viable.

Possibility: With astute budget development and negotiation by PYA, your clinical trials program can support your goal of bringing clinical options to your patients.

Myth: Clinical trials compliance is unwieldy.

Possibility: Even though clinical trials have grown increasingly complex, PYA can help you address compliance requirements efficiently.

Myth: Clinical trial startup is too cumbersome.

Possibility: You can streamline your trial activation process with PYA's dedicated and coordinated approach to initiation activities.

We are your turnkey solution.

Whether you are looking to activate a clinical trial or strengthen or manage your trials, PYA's Clinical Research Administration Office (CRAO) can streamline your operations and help you realize significant savings in time and money. Your clinical trials program can run at peak performance, as you improve patient lives with more clinical trial offerings.

We are your partners for success.

We are deeply skilled and experienced in all aspects of clinical trial budgeting, contracting, and compliance. We help you hit the ground running to expedite start-up activities or strengthen existing clinical trials then support you throughout the course of the trials.

Unsure if clinical trials are for you?
PYA can help.

Clinical Research Administration Office

Our Services

We work in close partnership with our clients to help meet clinical trial requirements.

Turnkey Study Start-Up Activities

To help ensure your clinical trials program is compliant and financially viable, we don't skim the surface. We can elevate your program by providing these essential services:

- **Coverage Analysis**
- **Budgeting**
- **Business Term Contract Negotiation**

It's about nimbleness and experience, traits we employ as we help you activate your clinical trials:

Move quickly.

We can initiate trials quickly to expedite patient enrollment and maintain positive study sponsor relations.

Plan responsibly.

We approach financial reviews with strong regulatory backgrounds to create an accurate budget and recoup your study costs successfully.

Negotiate expertly.

We review contracts to ensure the appropriate business terms are negotiated into the agreements.

Additional Services

Clinical trials are an important component of clinical research programs. As you study human health, you might seek broader guidance. PYA can help.

Strategy, Operations, Compliance, and Consulting

Whether your clinical research program needs short-term assistance for a specific issue or you are contemplating outsourcing operational or financial components, PYA can be of assistance. Our successful track record—from introducing trials quickly to maximizing financial opportunities—is a result of years of research-industry experience at all levels.

We use time-tested knowledge to benefit you:

- **Strategies that will facilitate clinical research program viability**
- **A customized program assessment with a focus on short- and long-term operational excellence**
- **Rapid evaluation of the key compliance elements in your research program**
- **Actionable recommendations that can be implemented quickly**

If you would like guidance with any matter related to clinical trial activation or administration or you're seeking consulting for clinical research, please call 800-270-9629 or visit pyapc.com/clinical-research for more information.
